Product Information

I-GEL AIRWAY KIT *with ResQPOD*

This unique kit incorporates the latest innovation in advanced airway management and circulatory enhancement.

Included in the kit are:

- 2 X i-gel airways (size 3 & 4)
- 1 X ResQPOD
- 1 X Adult Bag Valve Mask
- 1 X Child Bag Valve Mask
- 1 X Lubricant & Ribbon

The new innovative I-GEL allows responders to secure an airway reliably with 6 seconds. The i-gel airway is a novel and innovative supraglottic airway management device, made of a medical grade thermoplastic elastomer, which is soft, gel-like and transparent.

The i-gel is designed to create a non-inflatable anatomical seal of the pharyngeal, laryngeal and perilaryngeal structures whilst avoiding compression trauma.

The ResQPOD is an impedance threshold device that prevents unnecessary air from entering the chest during CPR. As the chest wall recoils, the vacuum in the thorax is greater. This enhanced vacuum pulls more blood back to the heart, doubling the blood flow during CPR.

These two revolutionary devices are essential components of QUALITY CPR.
